Subject: REACH Regulation (CE n. 1907/2006)

Dear Customer,

The new European Regulation 1970/2006 relevant to safety of chemicals named REACH (Registration, Evaluation and Authorization of Chemicals), states new rules on how to manage chemicals and at the same time asserts the necessity of communication between customers and suppliers of substances, preparations and articles.

We kindly inform you that **TM&C S.r.l., settled in Milan (Italy), as Only Representative of JSC Electrometallurgical Works "Dneprospetsstal"- Ukraine** (as per art. 8 of REACH Regulation), **pre-registered at European Chemicals Agency (ECHA) all substances subjected to REACH Regulation contained in the goods produced by JSC Electrometallurgical Works "Dneprospetsstal"- Ukraine and sold by DSS INTERNATIONAL SA**, in order to take advantage of the transition period (3, 5 and 11 years) to complete the Registration.

Thanks to our diligence in fulfilling this Regulation **you will be able to purchase goods from DSS INTERNATIONAL SA without any problem** also after November 30, 2008. According to REACH Regulation you will be considered as "Downstream Users" of such substances and will not have to face REACH obligations as "Importer".

You can get evidence of the pre-registration of the substances included in the product you presently purchase from DSS INTERNATIONAL SA through the identification number assigned to such substances by the European Chemicals Agency (ECHA), sending us a request in written form.

The identity code (UUID) given to TM&C S.r.l. by the European Chemicals Agency is the following: ECHA-e97c9af9-1c36-4f6e-80b0-a20431ebe853.

We remind you that we are in an initial and transitory period. Therefore the present letter is just a preliminary exchange of information. In future, in order to proceed with the categorization of the products and the registration of the substances, we will need data from you, especially in regard to the specific uses of the materials.

In relation to the possible request of authorization to ECHA regarding the presence of high-concern substances in the goods you purchase from DSS INTERNATIONAL SA, for the time being and due to the incompleteness of Annex XIV of REACH Regulation we are not ready to assure you that it will not be necessary.

For any matters, please do not hesitate to contact:
